South Tangerang

Active Information Systems student (6th semester, GPA 3.71/4.00) seeking a Software Engineer or Web Developer internship. Experienced across the full stack, built a production-ready RESTful API backend for a multi-module SaaS platform (Laravel, Sanctum) and independently developed a full-stack portfolio system with CI/CD and automated testing. Strong analytical thinker with a fast-learning, detail-oriented approach to new technologies.

Project Experience

KLolain - South Tangerang, Indonesia

May 2026 - Jun 2026

Team | Backend Developer

- Developed a full-featured RESTful API backend using Laravel 12 and Laravel Sanctum for a production-ready SaaS platform (currently in pre-deployment testing) targeting Indonesian SMEs (UMKM), covering invoice management, product catalog, and point-of-sale features.
- Implemented core API modules, including token-based authentication (1-device session) and invoice CRUD with real-time stock validation, and multirole user management across 4 role types (owner, admin, manager, staff)
- Built the backend API and data models powering an SEO & Marketing module, including per-product SEO metadata endpoints and a landing page builder API (hero sections, promo banners, testimonials)
- Applied Soft Delete across 10 database tables with soft-delete-aware unique validation rules to ensure data integrity across all modules
- Built an automated daily backup system (Laravel Scheduler + PostgreSQL pg_dump) and managed 20+ migration files, with full API documentation via Postman (v7, 100+ endpoints)

Personal Portfolio System - South Tangerang, Indonesia

Jul 2026

Personal Project | Fullstack Developer

- Independently designed and built a dual-stack portfolio system: a Laravel 12 + Livewire 3 backend with a full admin panel and REST API and a decoupled Next.js 15 (App Router) + TypeScript frontend consuming that API
- Implemented dark/light theming with system-preference detection across both applications, dynamic SEO metadata generation per page using Next.js Server Components, and an auto-generated sitemap and robots.txt
- Built a spam-resistant contact form (honeypot protection, rate limiting, server-side validation) with automated email notifications and interview/meeting scheduling
- Engineered an automated daily backup system (Laravel Scheduler + PostgreSQL pg_dump) that archives the database and uploaded files, emails the backup, and prunes old archives on a retention policy
- Wrote 31 automated feature tests (PHPUnit), achieving broad coverage of form validation, spam protection, and the backup command, and configured GitHub Actions CI to run the full test suite and a production build on every push

Attendance App - South Tangerang, Indonesia

Nov 2025 - Jan 2026

Team | Frontend Developer

- Contributed as 1 of 3 team members (alongside UI/UX Designer and Backend Developer roles), independently handling the frontend development of a mobile attendance management application using Flutter with a clean and intuitive user interface
- Implemented 5 key feature areas, authentication, dashboard, attendance records, leave request, and profile management, structured around a REST API-based backend architecture

Hvn Cakes - South Tangerang, Indonesia

Jul 2024

Personal Project | Fullstack Developer

- Developed a 5-page responsive e-commerce website for a local bakery business, showcasing a catalog of 20+ products across multiple categories using semantic HTML, CSS, and JavaScript with a mobile-first design approach
- Built a client-side shopping cart and checkout system with automatic order total calculation, integrating the WhatsApp Business API to send structured customer order data directly to the seller

Education Level

University Pamulang - South Tangerang, Indonesia

Feb 2024 - Jul 2028 (Expected)

Bachelor of Information Systems, 3.71/4.00

Organisational Experience

SDN Kramat Pela 09 Pagi Alumni Community - Jakarta, Indonesia

Jan 2022 - Present

Event Coordinator

An alumni community of SDN Kramat Pela 09 Pagi that organizes annual gatherings to maintain connections among former students

- Organized yearly alumni meetings since 2022, including annual Ramadan iftar gatherings, culminating in a large-scale reunion at a villa venue in 2025 for approximately 30 attendees. Continue to oversee planning, financial management, vendor coordination, and logistics for each annual event.
